

## Plume-abatement& water-saving cooling tower

Plume-abatement and water-saving cooling tower is a new type cooling tower incorporated with high technology for environmentally friendly and water resources shortage area.

### Plume-abatement Device Components

- High efficiency Heat exchanger
- Electrical control air regulating device
- 3D air mixer
- Piping system for plume abatement equipment (Dry section)

### Advantage

- Low chemical consumption for dosing system
- Corrosion Resistance
- Low Fouling Potential
- Water conservation
